**NON-RECLAIMABLE WASTEWATER SYSTEM
 INDUSTRIAL WASTEWATER PERMIT No. 4919**

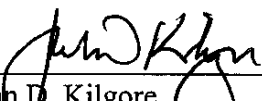

COMPANY: TAMCO		
MAILING ADDRESS: P.O. Box 325, Rancho Cucamonga, CA 91739-0325		
ADDRESS: 12459 Arrow Route, Etiwanda, CA 91739		
AUTHORIZED OFFICER: Leonard Robinson	CONTACT PERSON: Mike Perchan/Leonard Robinson	PHONE: (909) 899-0660 FAX: (909) 899-1910
WASTEWATER FLOW RATE: Daily Average: 0 Daily Maximum: 0 Peak Discharge: 0	PERMIT EFFECTIVE DATE: See Issuance date below EXPIRATION DATE: 5 Years from Issuance Date RE-APPLICATION DEADLINE: 4 1/2 Years from Issuance Date	
IEUA CAPACITY & OPTION UNITS: Capacity Units: 6 units at 15-gpm each Option units: 0 unit	INDUSTRIAL CATEGORY : Iron and Steel Manufacturing (40 CFR Part 420) PROCESS WASTEWATER: N/A	

In accordance with the provisions of the IEUA Non-Reclaimable Wastewater Ordinance (Presently Ordinance No.62) and the CSDLAC Wastewater Ordinance (dated April 1, 1972, as amended July 1, 1998), TAMCO (henceforth "Permittee") is issued this permit for the above facility. Compliance with this permit does not relieve the Permittee of the obligations to comply with the provisions of the IEUA Non-Reclaimable Wastewater Ordinance, the CSDLAC Wastewater Ordinance, IEUA and CSDLAC policies and guidelines, any applicable pretreatment regulations, standards or requirements under local, California state, and Federal laws and regulations. Noncompliance with any term or condition of this permit shall constitute a violation of the above referenced Ordinances. A copy of the above referenced Ordinances is given in Appendix A.

This permit is issued on this 8th day of January, 1999, and expires Jan 6, 2004.

By:

 John C. Gundlach
 Manager of Industrial Waste
 Inland Empire Utilities Agency
 Date: 12 / 17 / 98

 John D. Kilgore
 Supervising Engineer, Industrial Waste Section
 County Sanitation District of Los Angeles County
 Date: 1 / 6 / 99

I. GENERAL CONDITIONS

A. Abbreviations:

- IEUA - Inland Empire Utilities Agency (the Agency)
- CFR - Code of Federal Regulations
- CSDLAC - County Sanitation Districts of Los Angeles County (the Districts)
- USEPA - United States Environmental Protection Agency
- NRWS - Non-Reclaimable Waste System
- POTW - Publicly Owned Treatment Works

B. Wastewater Discharges

At the time of the issuance of this permit, Permittee's facility does not have an active pipeline connection to the NRWS. The connection was voluntarily severed by Permittee as a corrective action to comply with the conditions of the previous permit. This permit is issued to reflect that Permittee is not discharging wastewater to the NRWS. Reissuance of a permit to discharge wastewater is contingent upon installation of a pretreatment system by the Permittee at its facility.

C. Duty to Comply

The Permittee must comply with all conditions of this permit. Failure to comply with the requirements of this permit may be justification for administrative action or enforcement proceedings, including civil or criminal penalties, injunctive relief, and summary abatements.

D. Notification of Change

The Permittee, during the tenure of this permit, is required to notify currently both IEUA and CSDLAC in advance of any change in the status of the facility, including, but not limited to, ownership, authorized representative, operating responsibilities, business name, operating hours, and discharge duration

E. Duty to Mitigate

The Permittee shall take all reasonable steps to minimize or correct any adverse impact to the POTW and the environment resulting from noncompliance with this permit, including such accelerated or additional monitoring as necessary to determine the nature, source, and impact of the non-compliant discharge. Any discharge to the NRWS in excess of the discharge limitations contained herein requires immediate corrective action by the Permittee.

F. Property Rights

The issuance of this permit does not convey property rights of any sort, any exclusive privileges, or authorize any activity that results in injury to private property or any invasion of personal rights, nor any violation of Federal, State, or local laws or regulations.

G. Severability

The provisions of this permit are severable, and if any provision of this permit or the application of any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances and the remainder of this permit shall not be affected.

H. Pretreatment Standards and Requirements

The Permittee shall comply at all times with applicable Federal and State pretreatment standards and requirements as given in 40 CFR 403, *Federal Pretreatment Regulations for Existing and New Sources of Pollution*, the current IEUA Non-Reclaimable Wastewater Ordinance, the CSDLAC Wastewater Ordinance and any subsequent amendments thereof, and this permit, whichever is more stringent.

I. Permit Modification

This permit may be modified for good cause including, but not limited to, the following:

- 1) To incorporate any new or revised Federal, State, or local pretreatment standards or requirements;
- 2) To accommodate material or substantial changes to the Permittee's industrial processes, production, operations or the method of wastewater treatment, which create a significant change in the quality or quantity of industrial wastewater discharged,
- 3) To incorporate a change in any condition that requires either a temporary or permanent reduction or elimination of the authorized discharge;
- 4) To respond to information indicating that the permitted discharge poses a threat to the IEUA or the CSDLAC collection and treatment systems, personnel or the receiving waters;
- 5) To respond to violation of any terms or conditions of this permit;
- 6) To respond to misrepresentation or failure to disclose fully relevant facts in the permit application or in any required reporting;

- 7) To revise or grant a variance from such categorical standards pursuant to 40 CFR 403.13;
- 8) To correct typographical or other errors in the permit;
- 9) To respond to a permit modification request from the Permittee, provided that such request does not create a violation of any applicable requirements, standards, laws, rules or regulations.

This permit is issued based on the information provided by the Permittee in its permit application. Any significant change in wastewater quantity or quality, by a threshold level as specified in this permit if any, from the information reported in the permit application, may constitute grounds for a permit modification.

J. Permit Termination

This permit may be terminated for the following reasons:

- 1) Falsifying statements, representations, records, reports, or other documents to IEUA or CSDLAC;
- 2) Tampering with, or knowingly rendering inaccurate, any monitoring device or sample collection method;
- 3) Refusal to allow timely access to the facility premises for the purpose of inspection and monitoring;
- 4) Refusal to provide records, reports, plans, or other documents required by IEUA or CSDLAC to determine permit terms, conditions or limitations, discharge compliance, or compliance with the current IEUA Non-Reclaimable Wastewater Ordinance and the CSDLAC Wastewater Ordinance;
- 5) Failure to meet effluent limitations;
- 6) Failure to make timely payment of all amounts owed to IEUA for user charges, non-compliance fees, or any other fees;
- 7) Failure to meet compliance schedules;
- 8) Failure to report significant changes in operations or wastewater constituents and characteristics;
- 9) Failure to comply with the terms and conditions of an enforcement or permit suspension action or order;

- 10) Discharging wastewater to the IEUA and CSDLAC sewerage system while its permit is under suspension;
- 11) Failure to submit oral notice or written report of the occurrence of bypass;
- 12) Discharging wastewater that causes pass through or interference with the IEUA or the CSDLAC collection, treatment, or disposal system;
- 13) Discharging a slug load to the IEUA or the CSDLAC sewerage system.

K. Permit Amendment

Any proposed permit revision, including but not limited to, change of status which results in a desire to discharge wastewater will require submittals of plans and specifications of the pretreatment system to the IEUA and the CSDLAC for approval. Approval must be first obtained prior to implementation of any intended revisions.

L. Permit Transfers and the Requirement for a New Permit on Ownership Change

Permit transfers are prohibited as specified in Section 422 of the IEUA Non-Reclaimable Wastewater Ordinance and Section 401 of the CSDLAC Wastewater Ordinance. A new permit is required if a business changes ownership. The new owner shall notify concurrently both IEUA and CSDLAC of the ownership change immediately within twenty-four (24) hours, and submit a new permit application to IEUA within five (5) days of the change.

M. Treatment Permits Required for Hazardous Wastes

The Permittee shall not accept, treat, or dispose of wastes, determined to be hazardous according to 40 CFR 261 or Title 22, Division 4.5 of the California Code of Regulations, at the pretreatment facility, without a hazardous waste facilities permit as required by California Health and Safety Code, Section 25201.

N. Annual Publication of Names of Dischargers in Significant Non-Compliance

A list of the permittees discharging to the NRWS which were determined to be in significant noncompliance, as defined by the IEUA Non-Reclaimable Wastewater Ordinance and the USEPA General Pretreatment Regulation, will be published annually by IEUA and CSDLAC. Accordingly, the Permittee is advised that significant noncompliance with this permit, the IEUA Non-Reclaimable Wastewater Ordinance and the USEPA General Pretreatment Regulations, may lead to publication of the Permittee's name in the largest daily newspaper within the IEUA service area and in the largest daily newspaper within the CSDLAC service area.

O. Administrative Civil Penalties

Any person, or groups of persons, who violates any portion of the IEUA Non-Reclaimable Wastewater Ordinance, the CSDLAC Wastewater Ordinance, any permit condition, prohibition, or effluent limit, and any permit suspension or revocation order will be subject to administrative civil penalties.

The administrative civil penalties that may be assessed are not to exceed \$2,000 for each day for failing or refusing to furnish technical or monitoring reports, \$3,000 for each day for failing or refusing to timely comply with any compliance schedules, \$5,000 for each day and each violation for discharging wastewater in violation of any waste discharge limit or permit condition, and \$10 per gallon for discharging wastewater in violation of any permit suspension, permit revocation, cease and desist order or other orders, or prohibition issued or adopted by IEUA or CSDLAC.

P. Judicial Civil Penalties

Any person, or group of persons, who violates any conditions established in this permit will be subject to civil penalties including, but not limited to, a fine of up to \$25,000 per day of violation. Any person who violates any provisions of the IEUA Non-Reclaimable Wastewater Ordinance, the CSDLAC Wastewater Ordinance, any permit conditions, prohibitions, or effluent limitations shall be liable civilly for a penalty pursuant to Section 508 of the IEUA Non-Reclaimable Wastewater Ordinance and Section 202 of the CSDLAC Wastewater Ordinance for each day in which such violation occurs.

Q. Criminal Penalties

Any person who violates any provisions of the IEUA Non-Reclaimable Wastewater Ordinance, the CSDLAC Wastewater Ordinance, or any permit conditions, discharge prohibitions or effluent limitations, is guilty of a misdemeanor, which upon conviction is punishable by a fine not to exceed \$1,000, or imprisonment for not more than thirty (30) days, or both. Each day in which a violation occurs shall constitute a new and separate offense, and shall be subject to the penalties contained herein.

R. Recovery of Costs Incurred

In addition to civil and criminal liabilities, the Permittee violating any of the provisions established in this permit, or the IEUA Non-Reclaimable Wastewater Ordinance, or the CSDLAC Wastewater Ordinance, or causing damage to, or otherwise obstructing the NRWS or the CSDLAC sewerage system, shall be liable to the IEUA and the CSDLAC for any expense, loss, or damage caused by such violation. IEUA shall bill the Permittee for all costs incurred by the IEUA and the CSDLAC for any repair, cleaning, or replacement necessary as a result of the violation. Refusal to pay the assessed costs shall constitute a separate violation.

S. Inspection and Entry

The Permittee shall allow any authorized representative of the IEUA, the CSDLAC, the California Water Resources Control Board and its Regional Boards, the USEPA and other related agencies:

- 1) To have immediate access without delay to any facility directly or indirectly connected to the IEUA and the CSDLAC sewerage system any time wastewater is being discharged, any time the Permittee's facility is open or operating, and at any other reasonable times including, but not limited to, emergency situations.
- 2) to enter upon the Permittee's premises where a regulated facility or activity is located or conducted, or where records, as required by this permit, are kept;
- 3) To have access to and copy any records that must be maintained by the Permittee under the provisions of this permit;
- 4) To inspect any facilities, equipment (including equipment used for monitoring and/or controlling discharge to the NRWS), practices, or operations that are regulated and/or required under the provisions of this permit;
- 5) To sample or monitor, at any time, for purposes of assuring permit compliance, any substances, or parameters at any location;
- 6) to inspect any production, manufacturing, fabrication, or storage area where pollutants regulated under the provisions of this permit, could originate, be stored, or be discharged to the sewerage system, and
- 7) To study the industrial wastewater management facilities and wastewater discharges for the purpose of regulatory research.

T. Fact Sheet Posting

The industrial wastewater discharge permit fact sheet shall be posted visibly near the sampling location of the Permittee. The Fact Sheet is given in Appendix B, The Industrial Wastewater Discharge Permit Fact Sheet.

II. **WASTEWATER DISCHARGE LIMITS**

No discharge limits are listed herein based on the zero discharge status at the Permittee's facility. Compliance with this permit does not relieve the Permittee of the obligations to comply with the provisions of the IEUA Non-Reclaimable Wastewater Ordinance, the CSDLAC Wastewater Ordinance, IEUA and CSDLAC policies and guidelines, any applicable pretreatment regulations, standards or requirements under local, California state, and Federal laws and regulations. Noncompliance with any term or condition of this permit shall constitute a violation of the above referenced Ordinances.

III. WASTEWATER MONITORING REQUIREMENTS

Permittee is not required to monitor the wastewater based on the zero discharge status.

Waste hauler's reports or manifests must be obtained and kept on file for a period of at least four (4) years for any liquid, solids or hazardous wastes removed from the facility. These reports must be made available for inspection by representatives of the IEUA and the CSDLAC upon request.

IV. REPORTING REQUIREMENTS

Permittee is not required to submit any reports based on the zero discharge status.
